

• How to Print Window Clings •

Use the Mushrooms in Schools window clings to add flair to your cafeteria! These are easy to print and you can decide which ones to use to customize your look.

Each window cling can be printed at a local printing shop (or you can upload the design online). When printing at a local shop, follow our recommendations to get the highest quality product:

- ★ The size of each design can be in a range starting at 4" x 4". The design has the highest quality so if you want a larger window cling - get it!
- ★ Use our **pdf** to upload to print.
- ★ The decal should be transparent in the background.
- ★ Make sure the decals you order are made for windows and are easy to remove (and reuse) - such as using "static cling" options without adhesive.
- ★ If you plan to use the window clings on a hot slider station, make sure the printing product can handle hot temperatures.
- ★ A variety of online printing shops provide this service. **Vistaprint**, for example, provides user-friendly online printing services.

We recommend planning for the window clings to take up to one month to print (this will vary by vendor). Once you have the window clings in hand, place them on the serving line, doors entering the cafeteria, windows, and so much more!
